Weather- Second Iteration

Hybride- Combine the literal representation

I made with some abstract ideas

My literal rep showed a lot of data. can I show even more data- so maybe we'll start seeing different patterns?

then you can zoom in to a specific day/hour to get more details

representing the data with greyscale circles

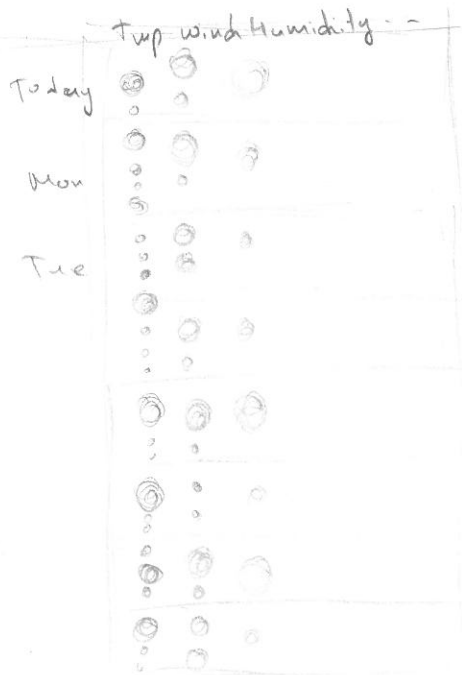

Then we can zoom in to a specific day to see more data

↑
a row of small icons for each day.

The icons are so small that at first glance look like pixels.

They are gray scaled by value

- Same as in icon but with circles changing size
